To whom it may concern

Re: Cryoultrasound

Liverpool Football Club has been using the cryoultrasound for 12 months now. We use it with our first team players for a wide variety of injuries. We find it particularly useful in the few days after an acute injury as well as with post-surgical cases.

The ability to combine the benefits of ice therapy and ultrasound is certainly unique and we are very happy with the results. We consider the cryoultrasound to be an important piece of equipment in our Department.

A handwritten signature in black ink, appearing to read 'Peter Brukner', followed by a long horizontal line extending to the right.
